SHORT LEADTIMES

MEMPHIS METAL'S SPIN ON FAN HOUSINGS

NO TOOLING CHARGES

SMALL ORDERS WELCOME

SINCE 1945, WHY HAVE MANUFACTURERS COME TO US FOR THEIR FAN HOUSING NEEDS?

CUSTOMIZED PARTS. At Memphis Metal, the customer specifies what is to be produced. We have no standard fan housings but will be pleased to make suggestions based on our many years experience in producing quality housings.

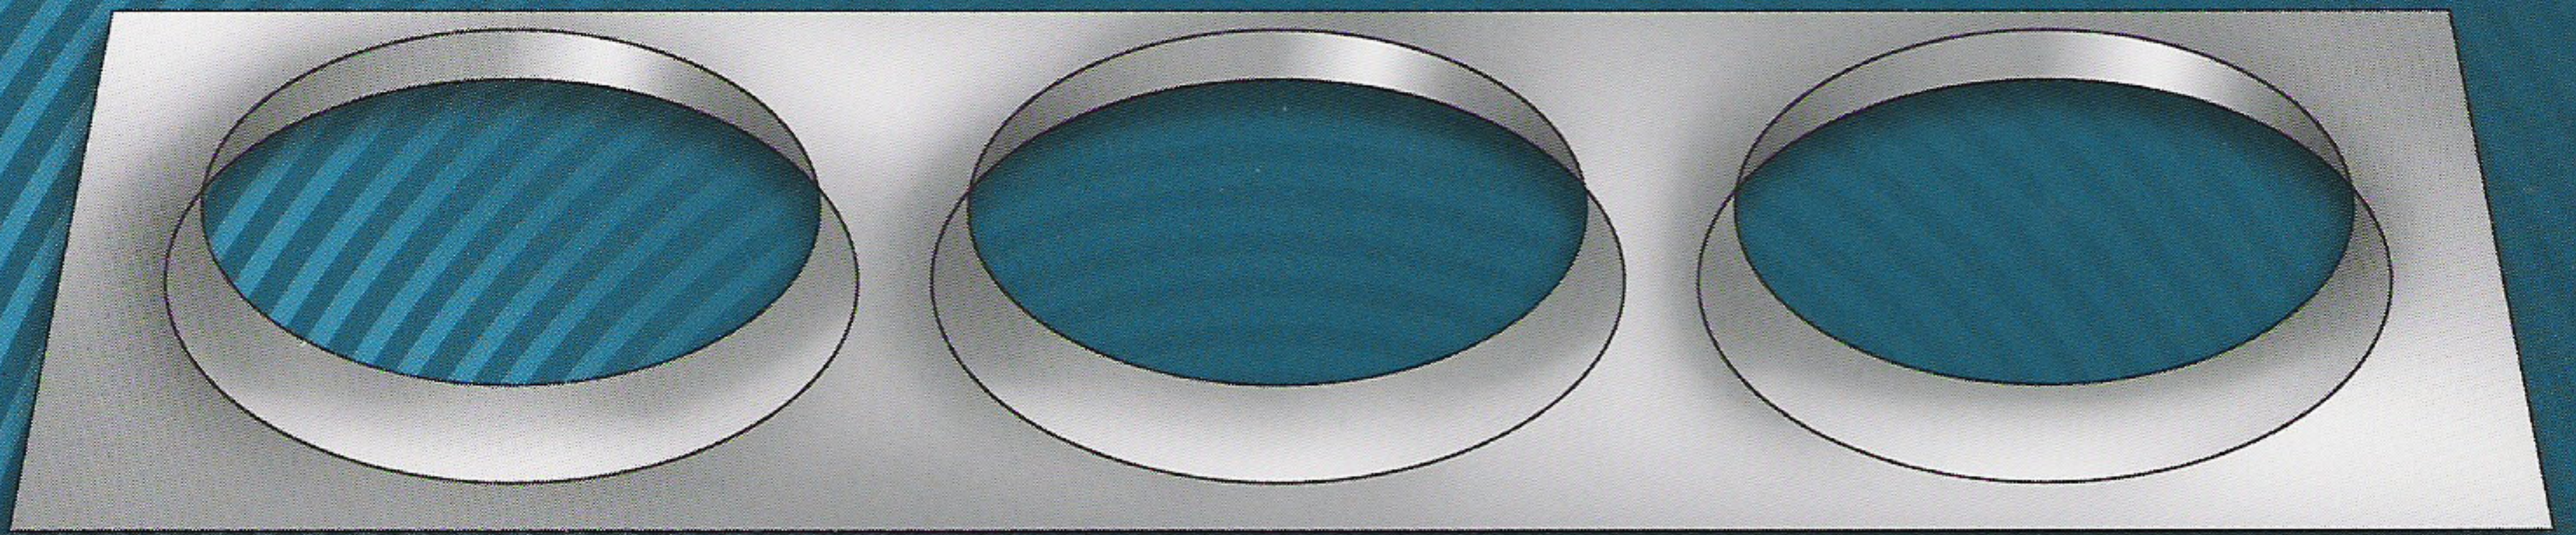

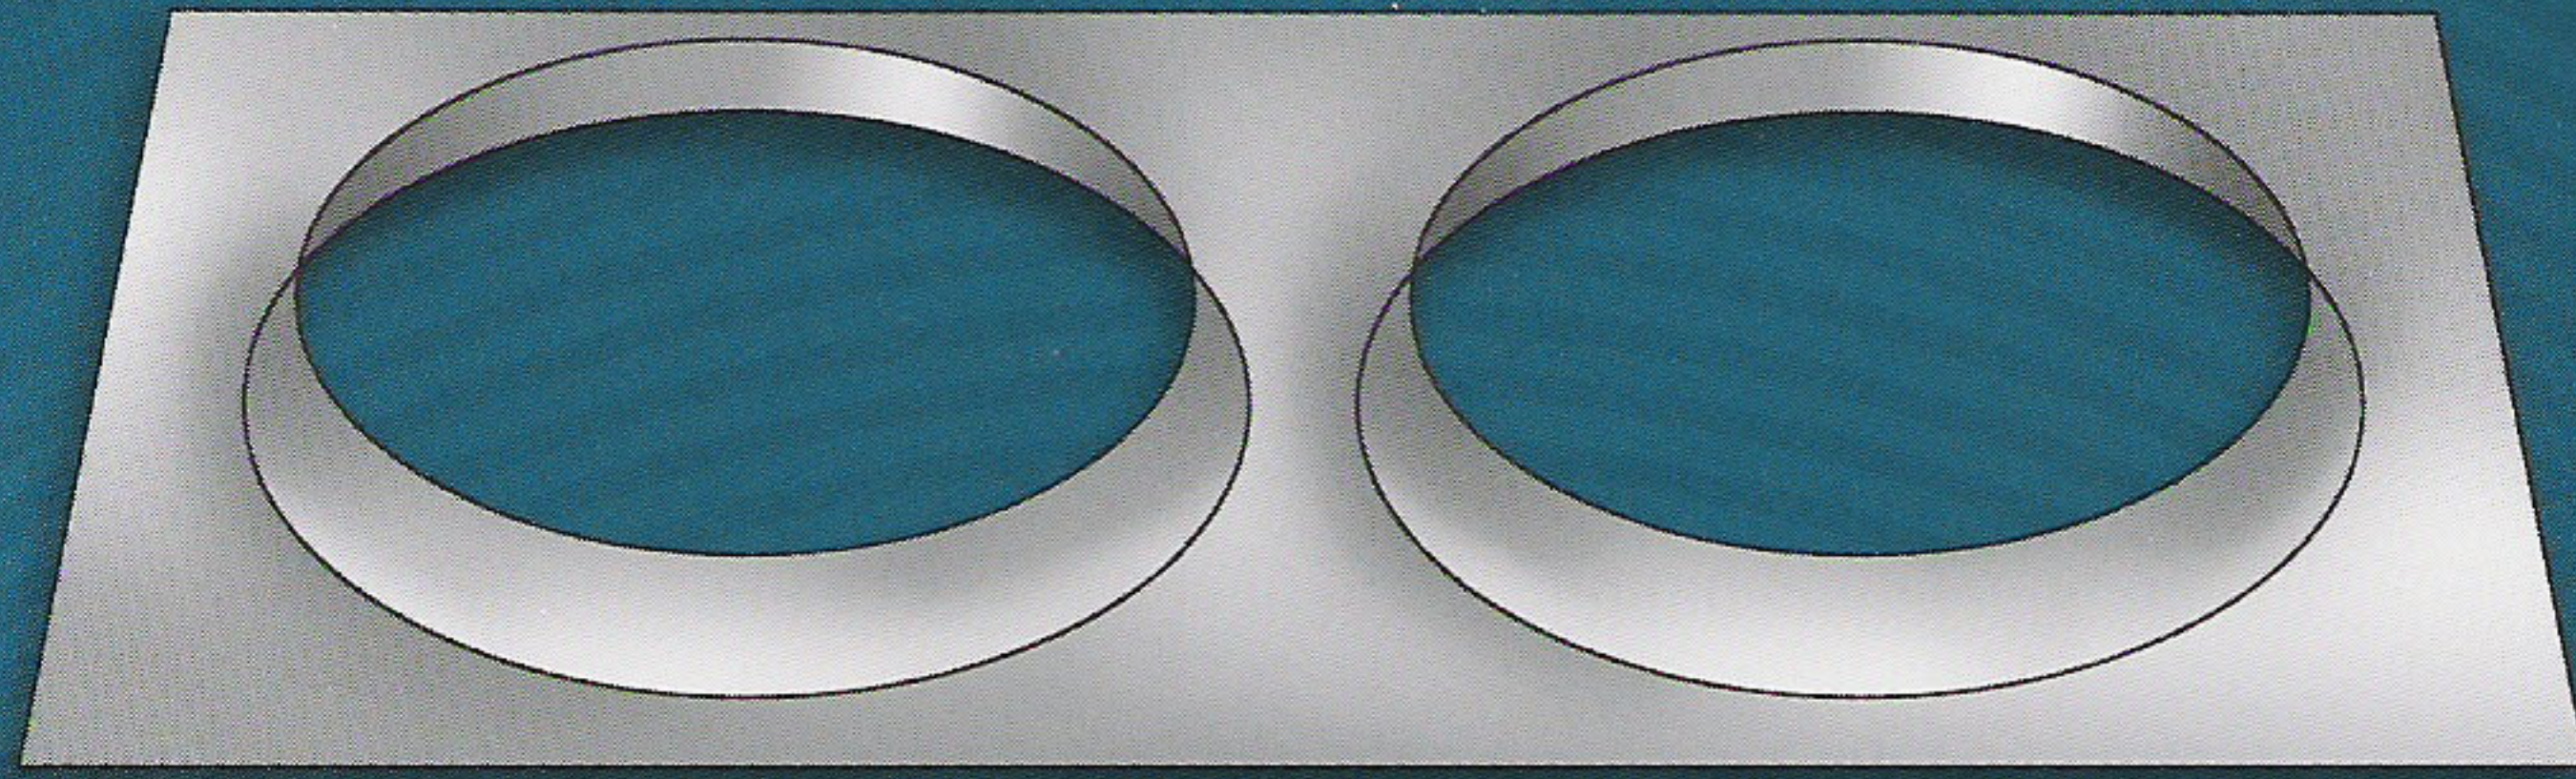

HIGH QUALITY. High quality materials and expert workmanship are the standards for operations at Memphis Metal.

NO TOOLING OR SET-UP CHARGES. Because of its unique patented spinning process, Memphis Metal requires no expensive tooling. For this reason, there are no tooling or set-up charges whether your order is for one piece or 1,000. Not only does this result in a cost savings to you, but it also provides your engineers with the flexibility to make changes in design parameters, e.g., venturi I.D., without incurring additional cost.

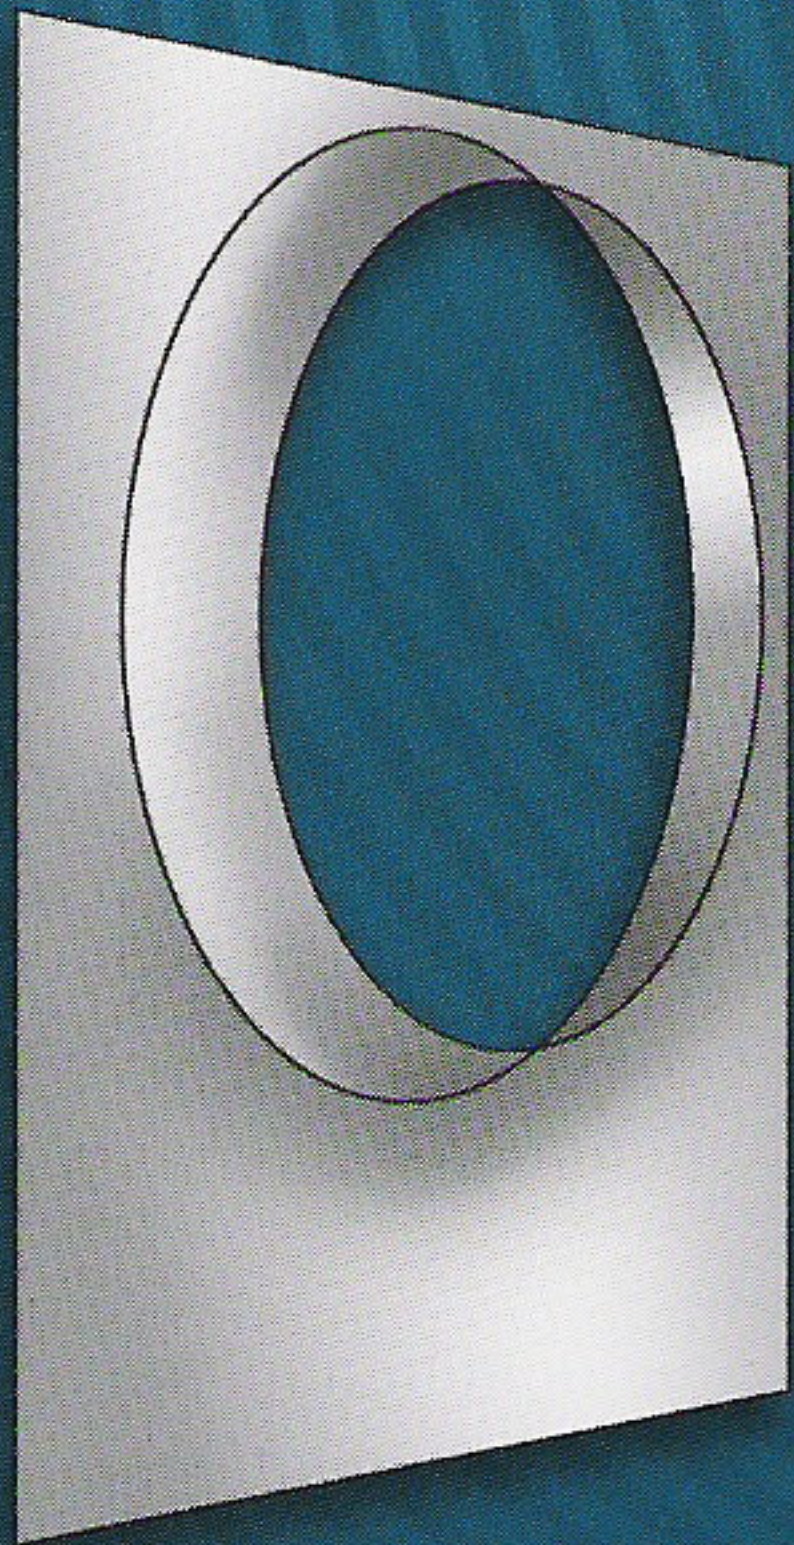

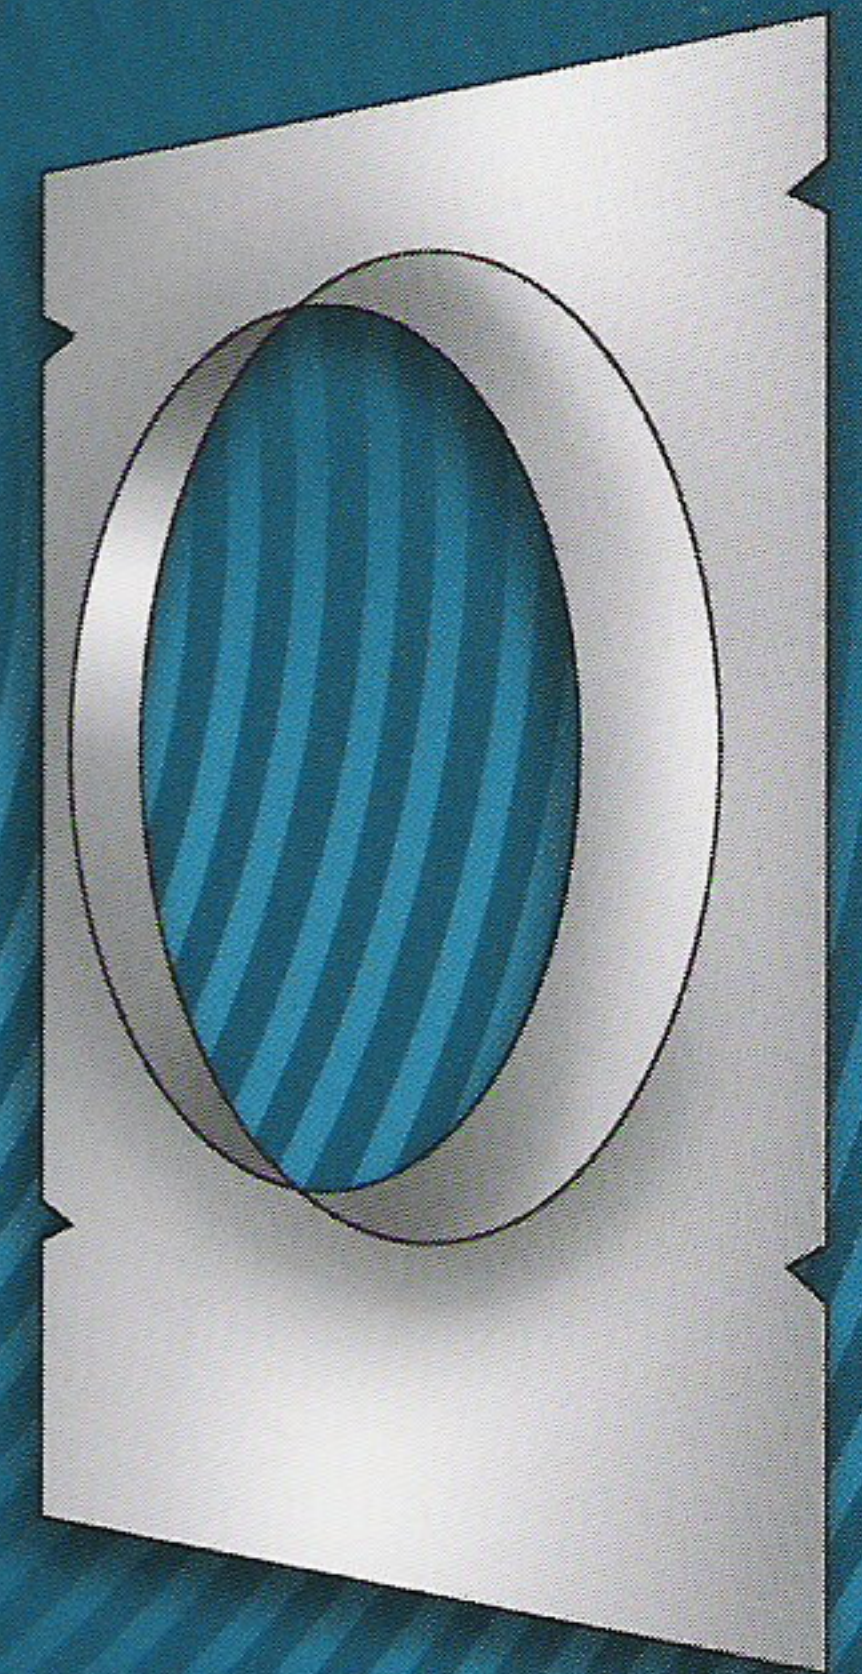

FAST TURNAROUND. Memphis Metal takes pride in being able to produce quality parts in short order to meet the needs of its customers. In that regard, lead times over the past 10 years have rarely exceeded three weeks. In most cases, we have been able to ship within less than 2 weeks.

SMALL ORDERS. Since 1945, our emphasis at Memphis Metal has been on quality and service to all our customers. Although we have customers who purchase 1,000 units per month, we have others who purchase only one or two units per year. Most of our customers order between 1 and 50 units at a time. Whether you need one prototype or 1,000 pieces, we promise to provide you with the same high quality and service that we have provided our customers over the many years we have been in business.

CUSTOMER SATISFACTION. Memphis Metal has many satisfied customers in the United States, Mexico, Canada, and Europe because we are responsive to their needs. Whether you need a quick quote, assistance with a fan-housing problem or to place an order, please give us a call so that we may add you to our list of satisfied customers.
